

## HOW TO USE

**1**

Make sure to run the chain around the bike frame (at minimum), and both wheels if possible.

**2**

Attach chain around a bicycle rack, pole, handrail, or other non-movable object that the chain can not be slipped over.

**3**

Chain locks are great deterrents for quick theft, but do not offer complete safety.

**4**

Try to lock your bicycle in a well-lit location that has some foot traffic.
